

Complete Fleet Information management System

These are questions asked by all fleet administrators.

We have the answers.

- ▶ Where is my truck?
- ▶ Where is the closest truck to that location?
- ▶ What is happening to my refrigerated goods?
- ▶ How can it be out of cellular range?

SkyNet Communications Fleet Information System provides: economical tracking, duress alarms and route management capabilities. These functions, and more, are provided through the use of a global satellite footprint. SkyNet is set apart from the pack with no reliance on conventional mobile phone systems.

The Fleet Information System applies to all fleets from long haul prime movers to executive limousines. Dedicated digital and analogue capabilities make keeping watch on sensitive freight a simple task. A fleet wide picture of all vehicles aids in route management and provides improved response times for clients. SkyNet also offers small, robust data terminals providing a short message service for short two way communications. With global coverage.

The System:

- Reduces time at base;
- Hybrid Sat & GSM Systems
- Conforms to legislation;
- Increases fuel economy;
- Enhances vehicle security;
- Demonstrates accountability;
- Records data automatically;
- Monitors fleets world-wide.

And more...

- Enables full vehicle utilisation;
- Can cut insurance premiums;
- Inspires customer confidence;
- Stop Log Location Reports;
- Instantly accesses fleet data;
- Monitors unauthorised use;
- Confirms vehicle logs;
- Facilitates duress alarms;
- Sends specified email alerts.

Fleet Management and Control

SkyNet's fleet system is a *global vehicle fleet tracking solution*. Reports triggered by factors such as chiller temperature, speed, low fuel or locations (geo-fences) will distribute specified messages via email or SMS. SkyNet customizes these triggers and messages according to the needs of the particular fleet. Photo imaging providing positive driver identification and two way text messaging complete the picture.

Key Features

- **Straightforward web interface**
 - ✓ no client software needed;
 - ✓ secure data storage available;
 - ✓ no user licensing;
- **Global fleet view;**
- **Dual Mapping Engines;**
- **Duress Alarms;**
- **Text Message Forwarding;**
- **Alarms**
 - ✓ on entering prohibited areas;
 - ✓ night movement;
 - ✓ speed; (and any others required)
- **Full administration interface;**
- **Integrated weather radar information;**
- **Configurable vehicle information;**
- **Vehicle Servicing and Log books;**
- **Historical trip with full map view & file download.**

Historical Map

View an entire fleet individually. The historical maps of the actual routes can be selected by date and time.

Simply scratch the surface of the system's capabilities and plan routes, increase efficiency and reduce costs. Stay informed, inform your customers, and move ahead of the game.
