

Locate, Track, Communicate getting vital information at Sea

With the SkyNet Marine Information System, all this and far more can be done without black spots or loss of signal due to restrictions in radius of operation that can be experienced with GSM & VHF.

Global Satellite coverage is here now and available economically and this technology is now within reach of every vessel. Marine vessels now can be automatically record when leaving the GEO fences of marinas and be constantly tracked according to the vessel owners requirements around the world.

Longitude	Heading	Speed	Location	Alt

The System:

- Reduces time at base;
- Conforms to legislation;
- Increases fuel economy;
- Enhances vessel security;
- Demonstrates accountability;
- Records data automatically;
- Monitors fleets world-wide.

And more...

- Enables full utilisation;
- Can cut insurance premiums;
- Inspires customer confidence;
- Reports Locations accurately;
- Instantly accesses fleet data;
- Monitors unauthorised use;
- Confirms vessel logs;
- Facilitates duress alarms;
- Sends specified email alerts.

Security at Sea

Though the threat of piracy is generally low world wide, if it were to happen on a vessel using a SkyNet D+ Satellite terminal, discreet alarms could be sent. The duress alarms are sent via strategically placed trigger points around the ship, allowing owners and companies to activate a fast coordinated response directly to a updated GPS location. The SkyNet system will integrate with current security systems to provide a total global security Marine net to offer confidence anywhere at sea.

Marine Information System

Benefits

- Operational safety;
- Reduce time in port;
- Increase fuel economy;
- Full utilization of vessel;
- Reduced insurance premiums;
- Vessel security;
- Monitor unlimited number of vessels;
- Monitor unauthorized use of vessel.

Features

- Duress alarms;
- Night movement alarm;
- Speed alarm;
- Geo Fence capability;
- Editable vessel specifications.
- SMS and email alerts for the alarms;
- Historical data in map and download;
- Global fleet view;

Real-time mapping:

View speed, direction & location on a map in real-time, 24/7.

Speed Alert:

Be notified when predefined speed has been exceeded.

SMS & Email Alert:

Be notified when a vehicle has been accessed.

History:

View historical data on vehicle past positions and activity.

Perimeter Alert:

Be notified when vessel exceeds predefined boundaries.

Theft Recovery:

Instantly access location information online.

Article: June 08, 2005, news.com.au

A MAN stole a \$350,000 luxury yacht and sailed it through treacherous waters from Melbourne to Tasmania because he was depressed and contemplating suicide, a court heard today.

Premier Cru, a 14-metre yacht part-owned by a Melbourne businessman was reported missing from the Blairgowrie Yacht Squadron in the Mornington Peninsula on January 31. The yacht was found three days later anchored off the Tasmanian town of Port Sorell.
